I looked at the data summary and it looks like there is only a slight accedence for propylene glycol. Please see if we can answer her. Ex. 6 - Personal Privacy is not a Carter Road resident but she is part of the group that visited us last month.

Very respectfully,

David Polish

"I've noticed that even people who claim everything is predestined, and that we can do nothing to change it, look before they cross the road." Steven Hawking

Hi, Trish and Dave,

can EPA put out any further statements that

can explain how the water is potable and drinkable and safe

and what you base it on--

Dimock residents and others are using your initial press release

that the water on Carter Rd. is fine and drinkable

and that they need not have any clean water delivered.

your statement is being used as proof by those who don't

want to see water delivered to Carter Rd. --

do you have recent test results ordered by Cabot in August 2011, that show glycols and other chemicals in the water sampled in Dimock and was released to the Dimock residents affected , to their attorney after the decision by DEP and EPA words that the water is potable.? I will include some of the test results in this email.

please help with this,
